I. INTRODUCTION

The Planning & Research Unit, Administrative Division of the RI Department of Corrections prepared this report. Data contained in the report were obtained through the Department's INFACITS database and analyzed by the Planning & Research Unit staff, unless noted otherwise.

The majority of information in this report is a summarization of RIDOC's stock population on December 31, 2001. Readers should be cautioned that stock data does not capture the flow of inmates into and out of RI's correctional system, instead stock data are a "snapshot" of RIDOC's population on one particular day. Please pay special attention to the title of each graphic, as the title will indicate if the data is representative of a time period other than the stock date (i.e., fiscal year, calendar year).

If you should require additional information regarding the information contained in this report, contact Bree Derrick, Principal Planner, at (401) 462-3921.

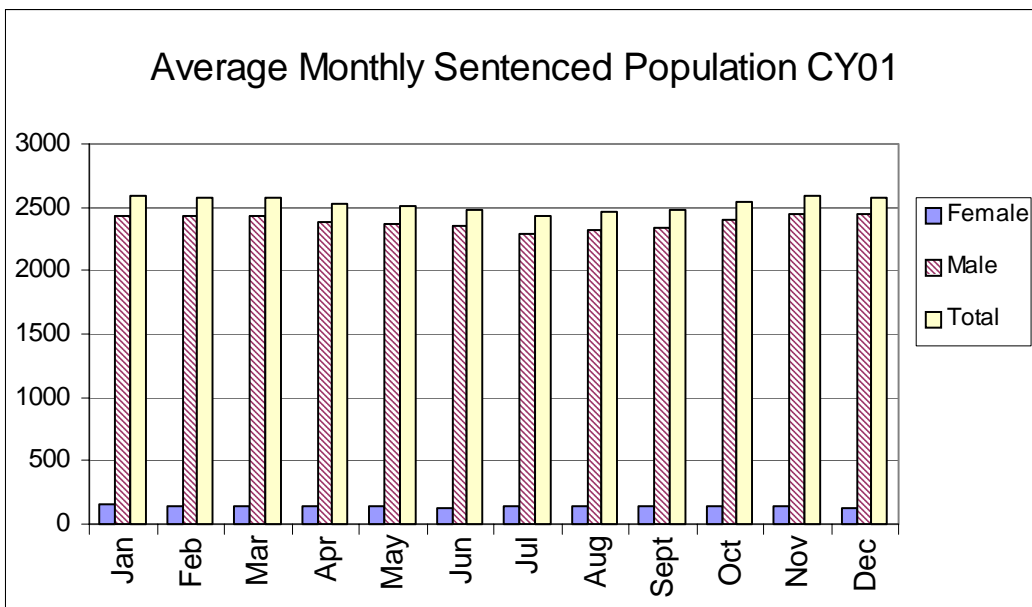

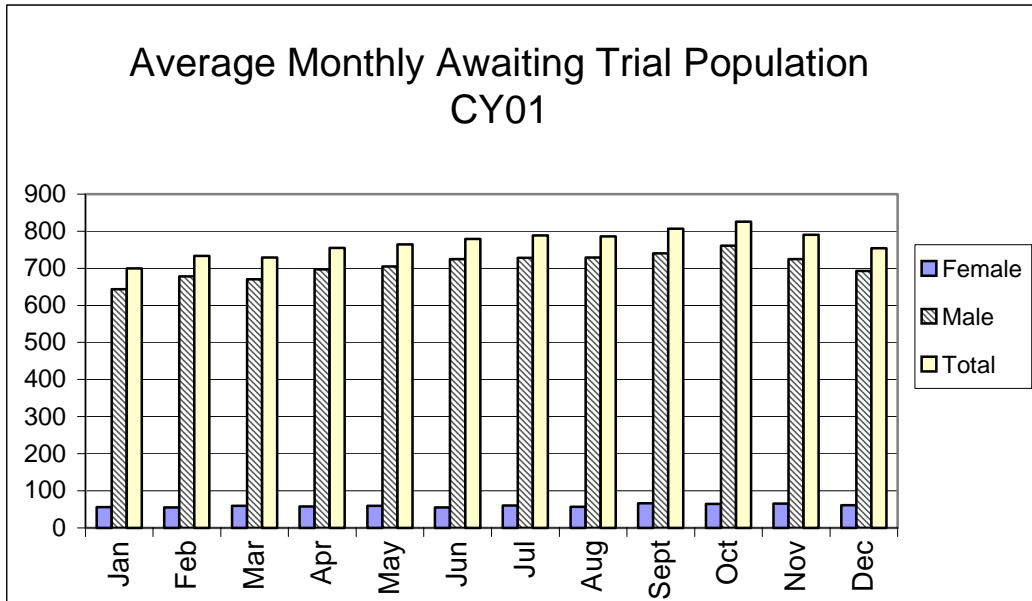

II. TOTAL POPULATION FY92- FY01

Summary:

The total prison population has experienced a net increase of 17% from FY92 to FY01.

Thus far in FY02 (not shown above), the total population is averaging slightly below that of FY01. In fact, the average total population for the first half of the current fiscal year is 3304 (200 females and 3104 males). The awaiting trial population is averaging 791, which represents an 8.7% increase over FY01. The sentenced population has decreased since FY01 by -4.1% (average=2513).

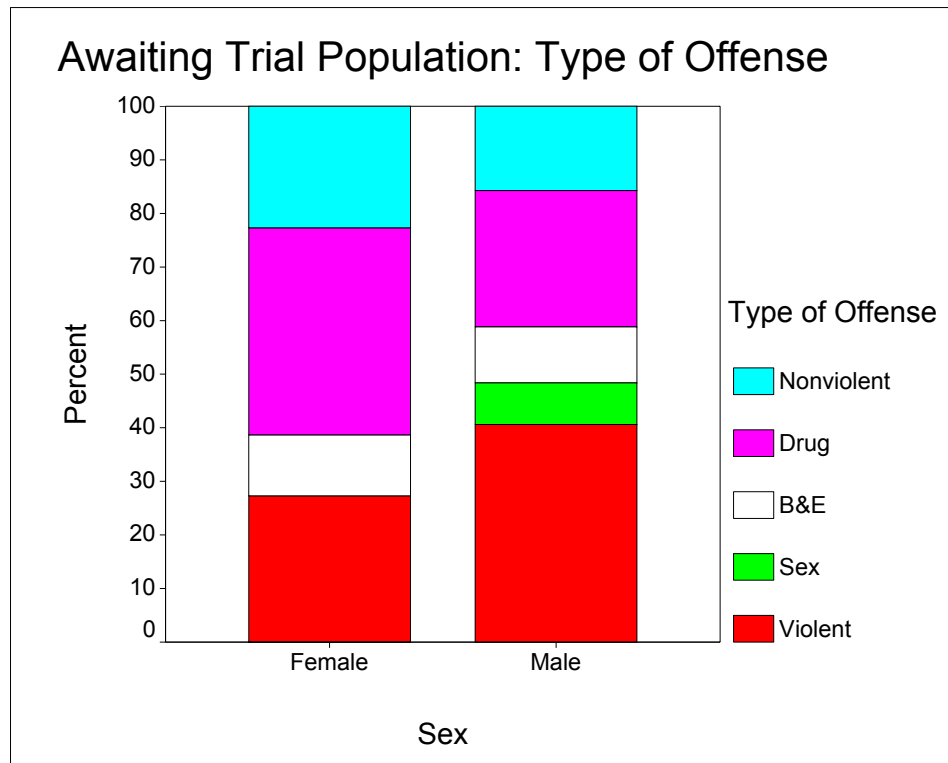

Summary:

As displayed in the first graphic, the total awaiting trial population rose steadily through October. Despite declining in November and December, the awaiting trial population experienced a net growth of 7.8% over the calendar year.

On the contrary, the total sentenced population declined by -0.5% in CY01. While both the male and female sentenced population decreased in the first half of the year (males -5.5%, females -17.8%), only the male population rebounded with a 4.8% growth rate from August to December. The female sentenced population, however, continued to decline from August to December (-8.3%). This data emphasizes the affect the large male population exerts on the total sentenced population.

III. AWAITING TRIAL POPULATION

			Type of Offense					Total
			Violent	Sex	B&E	Drug	Nonviolent	
SEX	Female	Count	12		5	17	10	44
		% within SEX	27.3%		11.4%	38.6%	22.7%	100.0%
	Male	Count	214	41	55	134	83	527
		% within SEX	40.6%	7.8%	10.4%	25.4%	15.8%	100.0%
Total		Count	226	41	60	151	93	571
		% within SEX	39.6%	7.2%	10.5%	26.4%	16.3%	100.0%

Summary:

The majority of females were awaiting trial for a drug-related offense on December 31, 2001. In contrast, the majority of males were awaiting trial for violent offenses.

There has been only slight variation in the offenses for which the December 31st awaiting trial population was being held versus the awaiting trial population on June 30th. The most striking differences occur within the female segment of the population, with the most common offense type changing from nonviolent in June to drug-related in December.

			RACE					Total
			ASIAN	BLACK	HISPANIC	OTHER	WHITE	
SEX	Female	Count		10	6		28	44
		% within SEX		22.7%	13.6%		63.6%	100.0%

Total		Count	6	161	136	2	268	573
		% within SEX	1.0%	28.1%	23.7%	.4%	46.8%	100.0%

Summary:

As can be seen in the graph, Whites constitute the largest proportion of awaiting trial offenders.

**Note: RIDOC records Hispanic as a race category rather than an ethnicity. As a result, we cannot determine whether inmates identifying themselves as Hispanic are white or black.*

			Age						Total
			under 20	20-29	30-39	40-49	50-59	60+

	% within SEX	8.0%	38.2%	33.9%	15.9%	3.3%	.7%	100.0%	

Summary:

Nearly three-quarters (72%) of the awaiting trial population at the ACI was between 20 and 40 years old on December 31st. The average age for all awaiting trial inmates was 31, with a range from 17-63.

For awaiting trial males, the average age is also 31, with a range of 17-63. The average age for awaiting trial females is 33, with a range of 19-53.

			Bail Categories			Total
			HELD w/o BAIL	UNDER \$10,000	OVER \$10,000

Total		Count	423	52	95	570
		% within SEX	74.2%	9.1%	16.7%	100.0%

Summary:

The large majority of the December 31st pre-trial population was being held without bail.

Of those inmates held without bail, 32% were awaiting trial for a violent offense and an additional 30% were awaiting trial for a drug-related offense.

IV. SENTENCED POPULATION

			Type of Offense					Total
			Violent	Sex	B&E	Drug	Nonviolent	
SEX	Female	Count	26	1	7	34	75	143
		% within SEX	18.2%	.7%	4.9%	23.8%	52.4%	100.0%

		% within SEX	38.1%	12.4%	9.6%	19.7%	20.2%	100.0%

Summary:

Included in the total sentenced population data on pages 9 thru 11 are eight (8) female offenders who were serving time at the Women's Transitional Housing Program on December 31, 2001. The Program opened in September 2001, and has had an average population of 7 offenders from September to December.

The most commonly occurring sentences for females are for the following crimes: Loiter for Prostitution (n=30), Shoplifting (n=9), and Possession on Cocaine (n=7).

The most commonly occurring sentences for males are for the following crimes: Robbery (n=257), Murder I(n=157), and 1st Degree Child Molestation (n=135).

V. COMMUNITY CONFINEMENT

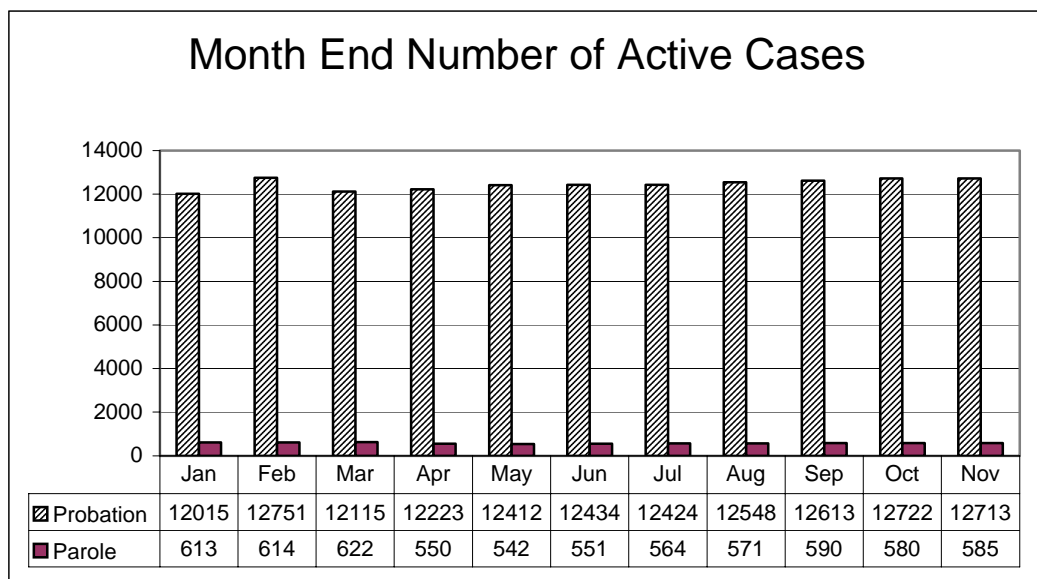

HOME CONFINEMENT STATISTICS

ADULT PROBATION & PAROLE STATISTICS

* Data presented below were provided by Adult Probation and Parole.

** The data below represent the number of active cases on the last day of each month. The following types of cases are *excluded* because they are under suspended supervision: cases having an active warrant issued for arrest, cases which are "banked" for being trouble-free, cases currently incarcerated, and those awaiting transfer from one caseload to another. At the time this report was created, data for December were not yet available.

Employee Grievance: any difference or dispute between the state and any employee with respect to the interpretation, application, or violation of any of the provisions of bargaining agreements.

-Heard includes grievances pending from previous months.
-Pending includes hearings to be scheduled.

VII. BUDGETARY STATISTICS

*Budgetary data provided by the RIDOC Financial Resources Unit.

Summary:

There has been a 32% increase in general revenues appropriations from FY93 to FY02.

The FY01 budget included a 13.65% wage increase for Rhode Island Brotherhood of Correctional Officers (RIBCO) union members.

In the FY02 Enacted Budget, a 3% wage increase is budgeted; however, most labor contracts have agreed to a 4% cost of living increase. Also, \$6.0 million is budgeted for retroactive wages to be paid over the next four years to RIBCO members.

Note: FY93-FY01 numbers are actual expenditures, while FY021 represents the enacted budget as of July 2001.
